HEATING & AIR CONDITIONING

PLATINUM INDOOR COIL

AN ESSENTIAL PART OF YOUR MATCHED SYSTEM

An evaporator coil plays a key role in any air conditioning or heat pump system. During warm weather, the coil in an air conditioner efficiently absorbs heat and removes humidity from your indoor air so that you can enjoy being cool, dry, and comfortable. In a heat pump, the evaporator coil performs a dual role in year-round comfort: cooling and dehumidifying your air when it's warm, and warming the air when the weather gets chilly.

OPTIMUM PERFORMANCE FROM PLATINUM COILS

American Standard® Heating and Air Conditioning's Platinum indoor coils come in a wide range of models to fit any budget or installation, but they all work the same, using a grid of tubes and fins to cool or heat the air. Their patented all-aluminum coil design makes them more efficient, easier to clean, and more corrosion resistant than standard coils—plus, the enhanced fin design offers superior humidity control when it's humid outside.

As part of a matched American Standard air conditioning or heat pump system, Platinum indoor coils ensure optimum efficiency and durability while they help lower utility bills.

AWARD-WINNING EXCELLENCE.

2021

Top Tier Owner Satisfaction for Central Air Conditioning "A National Product Testing and Research Magazine"

In a survey based on the proportion of members who are extremely likely to recommend their central air conditioning system to friends and family found American Standard Central Air Conditioning Systems' to be Top Tier in 2018 and 2020 Summer Surveys of 23,997 central air conditioning systems, owned by members who installed a new system between 2005-2020.

2019

Top Tier Owner Satisfaction for Gas Furnaces "A National Product Testing and Research Magazine"

In a 2018 Winter Survey & 2019 Summer Survey of 48,318 subscribers, American Standard gas furnaces rated Top Tier in Owner Satisfaction for new units purchased between 2003 & 2019.

Top Tier Owner Satisfaction for Heat Pumps "A National Product Testing and Research Magazine"

In a 2018 Winter Survey & 2019 Summer Survey of 12,463 subscribers, American Standard heat pumps rated Top Tier in Owner Satisfaction for new units purchased between 2003 & 2019.

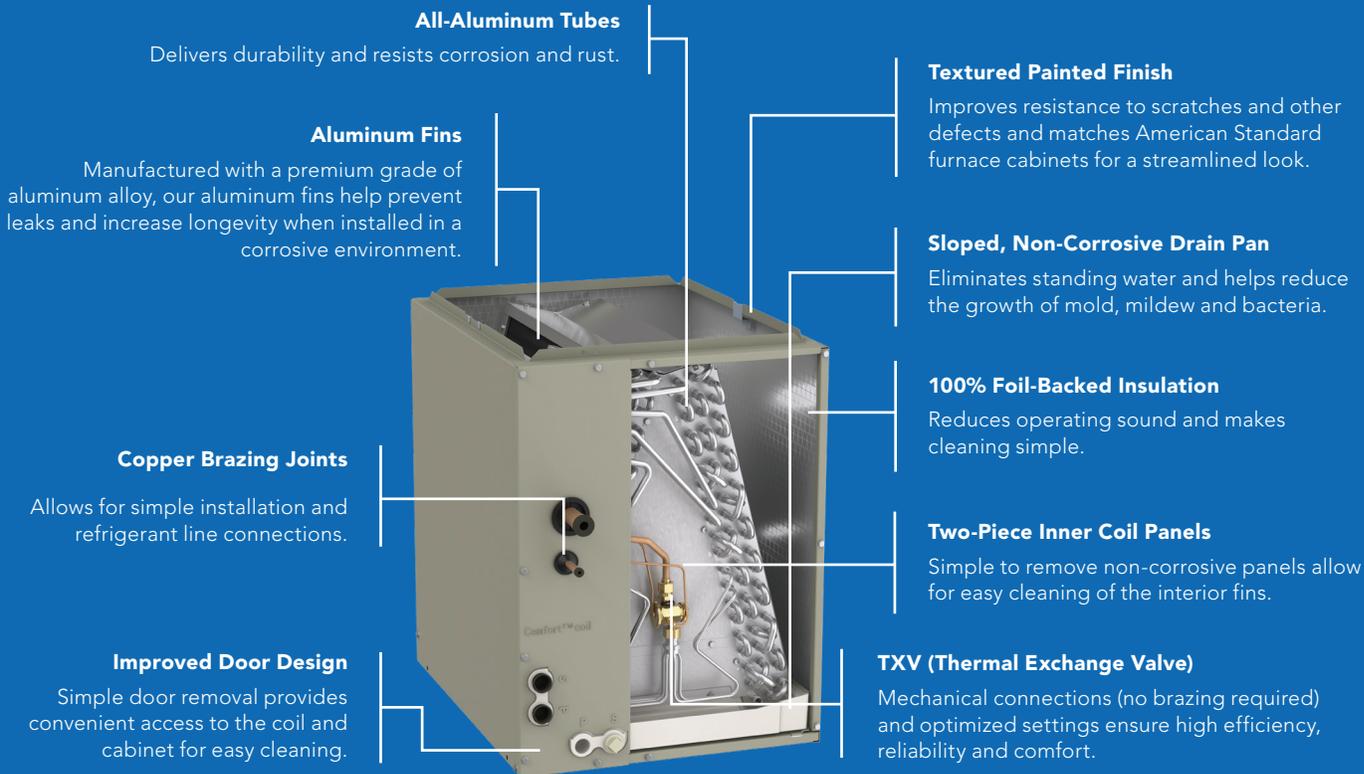

[†]Based on a statistical model that estimates problem rates for heating or cooling within the first 8 years of ownership, for heat pumps that are not covered by an extended warranty or service contract, American Standard heat pumps rated as Top Tier in a 2018 Winter Survey and 2019 Summer Survey of 12,463 heat pumps, owned by members who purchased a new heat pump [unit] between 2003 and 2019.

WE OBSESS OVER IT SO YOU DON'T.

For over a hundred years, we've made some of the most awarded, well-engineered heating and conditioning equipment, and earned a reputation for doing things ...right. And through it all, we've followed a pretty simple idea: "A Higher Standard" isn't just how we build our products. It's how we build our relationships with the customers who depend on us every single day.

A CLOSER LOOK

ALL-ALUMINUM

Our all-aluminum evaporator coils set a new industry standard by reducing leaks that often occur from corrosives like salt or common household cleaning products.

SETTING THE STANDARD FOR DURABILITY

Just like each of the components in our high-quality home comfort systems—each evaporator coil goes through a rigorous testing stage to check for durability and to reduce leaks. Lasting durability means your home can be comfortable and efficient now and for years to come.

KEEPING YOU IN MIND

Other indoor coils are often dirty because they're typically difficult to clean. American Standard fixed that problem by making our Platinum Indoor Coils with 100% foil-backed insulation, so they can be easily wiped down by your American Standard technician. They're even professionally washed clean of manufacturing agents before being assembled. The result is not just a cleaner coil—but higher performance of your HVAC system and, best of all, cleaner air for your family.

COMFORTABLE. RELIABLE. EFFICIENT.

Optimize the comfort and efficiency of your home with the American Standard Home smart comfort system. The American Standard Home mobile app gives you remote access to your HVAC system through your connected American Standard smart thermostat. Adjust your temperature, set your schedule, and view your HVAC usage from anywhere.

WHY IS INDOOR AIR QUALITY IMPORTANT?

We spend 90% of our time indoors, and 70% of that is in our home¹ where the air can be up to 5X poorer quality than the air outside². So, AccuClean[®] utilizes patented technology to deliver cleaner air to the whole home by removing up to 99.98% of airborne particles³ that pass through the re-usable filter, including 99.9% of the Influenza A (H1N1) virus⁴. The AccuClean[®] Whole Home Air Cleaner, when used in accordance with manufacturer's directions, is effective at removing a surrogate for the virus that causes COVID-19. Effective removal rate based on independent testing results using MS-2 bacteriophage, a bacteria representative of virus-sized particles like SARS-CoV-2 that causes COVID-19. This level of filtration makes it up to 100X more effective than a standard 1" filter⁵.

Certified asthma & allergy friendly[®] by the Asthma and Allergy Foundation of America.

With more than 65 million Americans suffering from asthma and allergies, this certification mark guides consumers in identifying products more suitable for people with asthma and allergies. The **asthma & allergy friendly[®]** Certification Mark is awarded only to those products that are scientifically proven to reduce exposure to asthma and allergy triggers.

American Standard Home connects to your American Standard HVAC system to provide you with remote control and diagnostics. To view additional integrations and subscriptions, visit our Knowledge Base at AmericanStandardAir.com/home-subscription.

¹ The National Human Activity Pattern Survey (2001)
² U.S. Environmental Protection Agency, EPA/600/6-87/002a. (1987)
³ Based on 3rd party testing of particle removal efficiency down to 0.3 microns (2005)
⁴ As reported by airmid healthgroup in ASCR092142v2 (2015)
⁵ Assuming <1% removal rate of 0.3 – 10 micron particles
